of Plastic and reconstructive
surgery, Geneva University
Hospitals, Switzerland

Prof. Raphael Guzman

Vice Chair, Department
of Neurosurgery,
University of Basel,
Switzerland

Microsurgery represents an essential tool for any surgeon aiming to handle with small vessels or nerves, and is mandatory in several specialties such as Neurosurgery, Hand surgery or Plastic and Reconstructive surgery. This discipline is evolving parallelly with the technology and its expertise must be regularly trained. More than a skill, microsurgery requires to adopt an attitude.

This advanced microsurgical course aims to provide a high-class training on living and non-living animal models. Experienced microsurgical faculties will support you developing your finest sense of the touch and will increase your precision and efficiency in Microsurgery. To maximize the benefit of this advanced course, it is recommended that participants have already attended to a basic microsurgical course before.

Prof. Philippe Bijlenga
Dr. Julien Haemmerli

Prof. Jean-Yves Beaulieu

Department of Orthopedy
and Traumatology, Geneva
University Hospitals,
Switzerland

Dr. Renato Gondar
