

CORPORATE R&D

# Boost your innovation strategies

The program offers Medtech companies:

- Immersion in a vibrant and creative environment with selected researchers and startups to nurture innovation
- Support to leverage a rich and fertile **ecosystem** of engineering schools and universities to build and feed your innovation pipeline
- Assistance in developing the best collaboration format with relevant stakeholders for your specific objectives
- Top-notch infrastructure, **expertise** and services to accelerate the development and testing of new surgical technologies with high **confidentiality**
- The right place to monitor technology and market trends related to the interventional medicine

It provides services such as:

- Simulated clinical environment for user-centered solution design and testing
- The right environment for medical devices validation & verification
- **Ethically** managed anatomical specimens
- Unvaluable access to resources, contacts and expertise through events, workshops, and networking activities
- Lounge, conference rooms, auditorium, wetlabs with high-end **biomedical** equipment
- Tailored events and specialized training sessions
