

STARTUP PROGRAM

Turn innovations into market-ready solutions

We facilitate the development and deployment of disruptive surgical technologies, by

- Providing top-notch infrastructures, expertise and services
- Encouraging market adoption and changes in operating practices
- Fostering collaboration between innovators, healthcare professionals, Medtech companies and investors
- Promoting innovative startups and solutions in the medical community and on the international stage

BENEFITS FOR STARTUPS

- Up to CHF 100'000.- in-kind loan to finance the SFITS services
- Simulated clinical environment for user-centered solution design and testing
- Support for medical devices validation & verification, possibly with anatomical specimens
- Rich base of resources, data and knowledge
- Network of medical experts, industrial partners, potential customers and investors
- Office space, conference rooms, auditorium, wetlabs with high-end biomedical equipment
- Professional video recording and editing services to prepare your pitch, marketing and training material
- SFITS communications, events and demo-days

STARTUP PROGRAM

Selection Criteria

- Demonstrated technological innovation
- Convincing business case
- Alignment with the SFITS missions and services
- Committed team, willing to collaborate with the SFITS in a pragmatic and open manner

We collaborate with

Medical learning apps

Real-time, ultra-high-resolution brain visualization during surgery

AI for Hospital Operations

Surgical robot

Ultra-realistic simulation models and mannequins

Urethral implants

We partner with

We sincerely thank our partners for supporting innovation in surgical technologies and their integration into the medicine of the future.
